Work Experience

Teaching Assistant | Front-end Developer & Information System Design Analysis

- Assisted 2 Front-End Development classes with 70+ students combined, covering HTML, CSS, and PHP.
- Guided students through web development practices, coding exercises, assignments, and troubleshooting.
- Assisted students in Analisis Perancangan Sistem Informasi (APSI), covering Context Diagram, Data Flow Diagram (DFD), and system analysis & modeling.
- Supported students during discussions and consultations by explaining technical concepts and helping them solve problems.

Projects and Competition

Moodal – UI/UX Design Project | TechSprint Innovation Competition 2026 & Bizznovation 2026

- Designed an AI-powered financial management and strategic planning platform for business owners, covering financial health monitoring, business health scoring, and AI-driven strategy recommendations.
- Led the end-to-end UI/UX process in Figma, from wireframing and design system development to interactive prototypes, achieving Top 10 in the competition.

KayuKita - UI/UX Design Project | Local Tech Battle 2026

- Designed an e-commerce and educational mobile platform aimed at empowering local woodcraft UMKMs by bridging them with modern digital markets.
- Conducted comprehensive user research and created high-fidelity interactive prototypes on Figma.
- Mapped intuitive user flows for three core specialized features: "Tau Kayu" (educational hub), "Cari Kayu" (smart marketplace), and "Buat Kayu" (custom order system).

Peonies Studio – Frontend Web Development | Academic Project (2025)

- Developed a pixel-perfect, fully responsive yoga class booking web platform replica to master advanced layout styling and grid structures.
- Wrote clean, semantic HTML and CSS from scratch to mirror complex navigational elements, interactive hover effects, and strict visual alignments.
